Learning Through Reflection - ascd.org
Core Thinking Skills. Thinking skills are cognitive operations or processes that are the building blocks of thinking. There are several core thinking skills including focusing, organizing, analyzing, evaluating and generating.

Thinking skills - analytical, critical and creative thinking
Situated learning is a theory on how individuals acquire professional skills, extending research on apprenticeship into how legitimate peripheral participation leads to membership in a community of practice. Situated learning "takes as its focus the relationship between learning and the social situation in which it occurs". The perspective can be contrasted with alternative views of learning ...

Experiential learning is the process of learning through experience, and is more specifically defined as "learning through reflection on doing". Hands-on learning is a form of experiential learning but does not necessarily involve students reflecting on their product. Experiential learning is distinct from rote or didactic learning, in which the learner plays a comparatively passive role.
Experiential learning - Wikipedia
Reflection is thinking for an extended period by linking recent experiences to earlier ones in order to promote a more complex and interrelated mental schema. It involves looking for commonalities, differences, and interrelations.
