Evaluating Research In Academic Journals
In academic publishing, the goal of peer review is to assess the quality of articles submitted for publication in a scholarly journal. Before an article is deemed appropriate to be published in a peer-reviewed journal, it must undergo the following process:

What Is A Peer-Reviewed Article? - Evaluating Information ...
Academic publishing is the subfield of publishing which distributes academic research and scholarship. Most academic work is published in academic journal article, book or thesis form. The part of academic written output that is not formally published but merely printed up or posted on the Internet is often called "grey literature". Most scientific and scholarly journals, and many academic and ...

Research is "creative and systematic work undertaken to increase the stock of knowledge, including knowledge of humans, culture and society, and the use of this stock of knowledge to devise new applications." It is used to establish or confirm facts, reaffirm the results of previous work, solve new or existing problems, support theorems, or develop new theories.

Evaluating source quality. All sources are not created equal. People write for many reasons – to inform, to entertain, to persuade, to describe, to mislead, to satirize – and the quality of information depends on this purpose.

Evaluating source quality - OWLL - Massey University
When you encounter any kind of source, consider: Authority - Who is the author? What is their point of view? Purpose - Why was the source created? Who is the intended audience? Publication & format - Where was it published? In what medium? Relevance - How is it relevant to your research? What is its scope?

Project MUSE
Valid research question and hypothesis, with a relevant theory to which the research question is being posed. Applies correct and transparent methodology, and the study design and materials are
clearly laid out. Language and presentation are clear and adequate, figures and tables are in line with scientific norms and standards. In line with Frontiers author guidelines on editorial and ethical ...  

About Frontiers | Academic Journals and Research Community  
IDEAS AND INNOVATIONS Authors may submit manuscripts proposing innovative ideas meant to influence pediatric practice, policy, education, or research. Manuscripts should include a thoughtful review of the relevant literature of the topic to support an argument that current ideas or practices should be changed to help the field of pediatrics progress.

The example in Fig. 2 illustrates that Research emanates from at least one Question at Hand, and aims for at least one piece of New Knowledge.According to our definition (concept model), you cannot call something Research if it is not aiming for New Knowledge and does not emanate from a Question at Hand. This is the way we define the concept in concept modelling, and this small example only ...
