Forensic Medicolegal Injury And Death Investigation
Forensic Medicolegal Injury And Death
Forensic Labs. The Los Angeles County Department of Medical Examiner-Coroner Forensic Sciences Laboratories Division is responsible for the identification, collection, preservation, and analysis of physical and medical evidence associated with Coroner’s cases.

Glossary of Terms
Autopsy also known as a post-mortem examination, necropsy (particularly as to non-human bodies), autopsia cadaverum, or obduction — is a highly specialized surgical procedure that consists of a thorough examination of a corpse to determine the cause and manner of death and to evaluate any disease or injury that may be present.

Case Search - Medical Examiner-Coroner
Forensic pathology is pathology that focuses on determining the cause of death by examining a corpse. A post mortem is performed by a medical examiner, usually during the investigation of criminal law cases and civil law cases in some jurisdictions. Coroners and medical examiners are also frequently asked to confirm the identity of a corpse. Also see forensic medicine.

INTRODUCTION “Equivocal death investigations are those inquiries that are open to interpretation. There may be two or more meanings and the case may present as either a homicide or a suicide depending upon the circumstances. The facts are purposefully vague or misleading as in the case of a “staged crime scene.” Or, the death is suspicious or questionable based upon what is presented to the ...

A coroner may conduct or order an inquest into the manner or cause of death, and investigate or confirm the identity of an unknown person who has been found dead within the coroner's jurisdiction. In medieval times, English coroners were Crown officials who held financial powers and conducted some judicial investigations in order to counterbalance the power of sheriffs.
