MS Management Information Systems | UAB Online Degrees

As you can see, these definitions focus on two different ways of describing information systems: the components that make up an information system and the role that those components play in an organization. Let’s take a look at each of these.

Chapter 1: What Is an Information System? - Information...

Information management (IM) concerns a cycle of organizational activity: the acquisition of information from one or more sources, the custodianship and the distribution of that information to those who need it, and its ultimate disposition through archiving or deletion. This cycle of organizational involvement with information involves a variety of stakeholders, including those who are...
