Muscular System Tests Questions And Answers
Muscular System Tests Questions And
Function of the Muscular System. Ahh the muscular system; it probably seems overwhelming at first, what with all those funky scientific names. There are over 600 skeletal muscles, and that number ...

What Is the Muscular System? - Function & How Muscles Work ...
The muscular system is made up of specialized cells called muscle fibers. Their main function is contractibility. Muscles, connected to bones or internal organs and blood vessels, are in charge for movement. Almost every movement in the body is the outcome of muscle contraction.

Autoantibodies are antibodies (immune proteins) that mistakenly target and react with a person's own tissues or organs. One or more autoantibodies may be produced by a person's immune system when it fails to distinguish between "self" and "non-self.". Usually the immune system is able to discriminate between foreign substances ("non-self") and the body's own cells ("self").
