Safety wire or locking-wire is a type of positive locking device that prevents fasteners from loosening or falling out due to vibration and other forces. The presence of safety wiring may also serve to indicate that the fasteners have been properly tightened. Safety wire is available in a variety of gauges and materials, depending on the application. In aircraft and racing applications ...

There's a reason Dr. Devon's recent video on Neurodiversity is going viral with over 28 million views. She offers a timely paradigm shift away from the deficit model and towards a universal acceptance and appreciation of neurodiversity as an evolutionary and societal advantage that is as critical to human existence as biodiversity.

Make the turntable: Slide the pencil through the center hole of the record so the tip extends an inch or so (a few cm) beyond the other side. Angle the pencil so it is perpendicular to the record, then position the assembly so the record lies horizontal and the pencil shaft is vertical, with the tip of the pencil pointing down towards the table and the eraser end pointing up towards the ceiling.
